# Panasonic®

Operating Instructions

Replacement Filter Unit Commercial Use

Model No. ET-RFV400

Thank you for purchasing this Panasonic product.
- Carefully read through these operating instructions and the operating instructions of the projector to ensure safe and proper operation.
- Please save this operating instructions for future use.

- Make sure to turn off the power and disconnect the power plug from the wall outlet before replacing the air filter unit.
- Make sure that the projector is stable, and perform the replacement in a safe place where the unit will not be damaged even if you drop the air filter unit.
- Do not put anything into the air vents. Doing so may result in malfunction of the projector.
- **Be sure to reset the filter counter after replacing the air filter unit.**
  Otherwise, "FILTER COUNTER has reached the set time." will appear on screen.

■ Illustrations in this operating instructions

- Illustrations contained in this operating instructions that show the projector may differ from the actual objects they depict.

■ Term

- In this manual, the "Wireless remote control unit" accessory is referred to as the "Remote control".
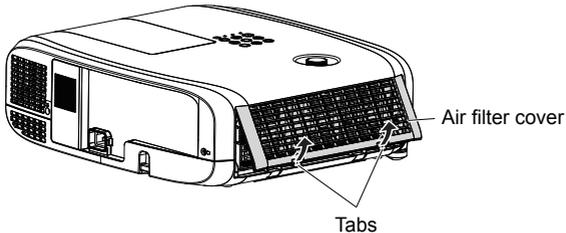

How to replace the air filter unit

1) Switching off the projector and then remove the AC power plug from the wall outlet.
  - When switching off the projector, make sure to follow the procedures in "Switching Off the Projector" in the operating instructions of the projector.
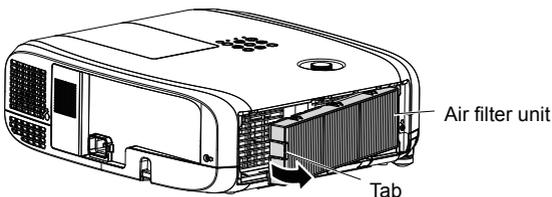

2) Remove the air filter cover.
  - Pull out the air filter cover from the hook of the projector while slightly pushing upward the tabs of the air filter cover and open it in the direction of the arrow in figure.
